

AAAP 4/510 Fall 2020

Cultures of Sustainability

CRN 17866 / 17867 | Monday | 10:15-11:45 am | REMOTE

Instructor: Chad Randl; crandl@uoregon.edu

Sustainable Preservation covers critical cultural, environmental and economic aspects of our built environment. How do we sustain our communities, saving valuable resources and reducing our carbon footprint? How can we live comfortably, without incurring costly utility bills? How can we do this while maintaining the integrity of our existing building stock and the communities and neighborhood they help define?

Learn first-hand about analyzing buildings and their surrounds, and the various ways to reduce man's impact on our dwindling resources.

This course will equip students with the technical and environmental knowledge needed to achieve higher standards of stewardship over our built environment and more innovative ways of preserving it for the benefit of future generations.
