

Landscape Architecture 699 Master's Project Clinic Spring 2023 with Professor Robert Ribe (they/he them/him their/his)

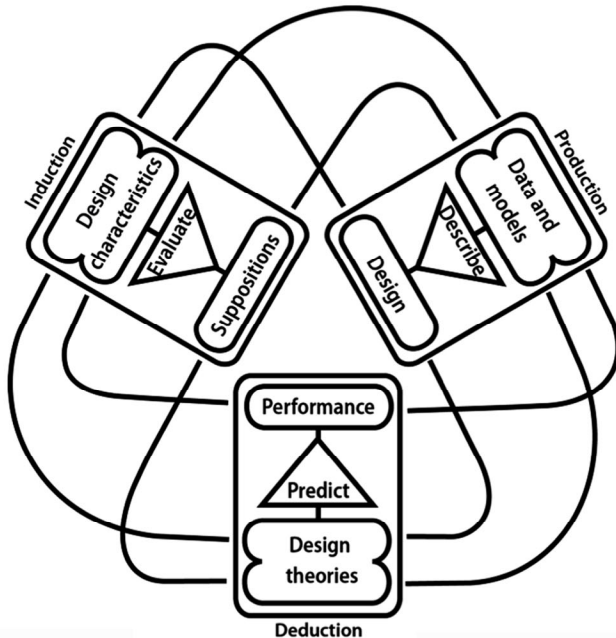

The class will enable students to finalize their designs, process strategies, evidence, arguments, diagrams, representations, analyses, descriptions, and interpretations into final, scripted, and illustrated presentations for oral delivery and publication.

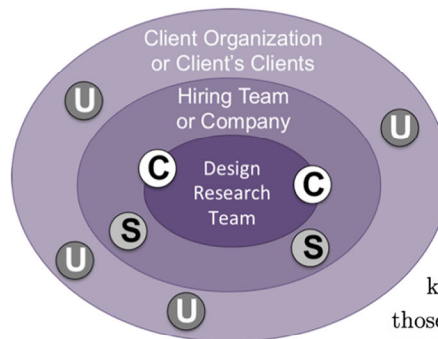

ACTIONABLE RESEARCH DELIVERABLES

Descriptive communication enables independent conclusions	Prescriptive communication suggests actions to be taken	Tangible artifacts can be touched and manipulated	Virtual artifacts have no physical substance
Quotes and Stories Observations Photographs	Scenarios Functional Analogies Imperatives	Embodied Insights Prototypes Take-aways	Video or Audio Clips Documentaries Websites
Experiential formats provide an interactive experience	Presentational formats broadcast data and insights	Abstracted information is simplified and less-detailed	Detailed information is rich and thoroughly describes
Interactive Games Immersion Narratives	Video or Audio clips Slide Decks Written Reports	Insight summaries Scenarios Visual Models	Photographs Pattern Languages Personas

Deliverable dimensions with examples

March's Model of Design

- C** = Collaborative Clients
- S** = Known Stakeholders
- U** = Unknown Stakeholders

Researchers are beholden to multiple stakeholders and only know or work with a subset of those stakeholders.

This class is only open to MLA students who have completed winter LA 699 either in 2022 or 2023 with a satisfactory verdict from Dr. Russel for that class.

Standards and expectations for final presentations and documents will be provided and Dr. Ribe will advise and assist students in seeking to achieve these.
