

LA 410/510 Fall 2024

Global Sustainability: Waste and the City

CRN 13053 - Tuesday 5:30-8:20 pm (Mostly Zoom + A few in-person sessions in LA 231)

Instructor: [Prof. Yekang Ko](#), yekangko@uoregon.edu

Sustainable Waste Management

Sustainable Cities and Landscapes

This online seminar course equips graduate students with global sustainability concepts, emphasizing the United Nations Sustainability and Development Goals (UN SDGs) related to waste and urbanization. Students gain insights into how industry and government leaders implement sustainability measures in their organizations by analyzing their Environmental, Social, and Corporate Governance (ESG) and other Sustainability reports.

The course allows students to engage with students from other universities and global leaders via real-time video conferencing and participate in cross-institutional case study teams, fostering professional competencies such as cross-cultural communication, teamwork, and equitable partnerships. This comprehensive approach prepares students for future interactions with diverse cultural and professional backgrounds.

The course will be conducted on a virtual platform synchronously and asynchronously. The synchronous sessions will consist of guest lectures, group presentations, and case study discussions. The asynchronous sessions will be video lectures, special lectures, preparations for the group work during the term and for the final project presentation.

This course welcomes participation from undergraduate seniors and graduate students across all disciplines. Course website from [Fall 2023](#) (Fall 2024 is expected to be similar.)

For LA/ENVD/ENVS/PPPM students, this course could serve as electives or Area of Concentration.
